Making waves. (wireless local area networks) (Connections)
Else, Kevin
DEC User, p45(1)
Feb, 1992
ISSN: 0263-6530   LANGUAGE: ENGLISH   RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 1111   LINE COUNT: 00088

ABSTRACT: Vendors are working together in Europe to develop the
integration tools necessary to connect **radio** transmission to network
architecture to continue the move toward wireless networks, but there is
disagreement in Europe about which standards should be adopted to implement
them. The methods of transmitting data across a wireless network are
infrared and laser signalling, microwave transmission and Spread Spectrum
Technology (SST). SST **broadcasts** a signal over a broad band of
frequencies but at a low density, which reduces interference and
interception. The UK Dept of Trade and Industry currently has approved only
one SST product, Arlan, from Telesystems, and it supports NetWare and
Transmission Control Protocol/ Internet Protocol (TCP/IP) over LAN Manager.
A conflict has arisen between wireless networks and mobile telephones,
which have conflicting interests, particularly since the Digital European
Cordless Telecommunications standard limits bandwidth to 1.1M-bits per
second, far too slow for data transmission. The IEEE 802.11 committee is
overseeing standards currently. Wireless communications will have a market,
but they will not replace existing networks.

**Vendor-sponsored directory. (third-party vendor alliances of interest to
the financial community) (directory)**
Wall Street Computer Review, v5, n8, p42(14)
May, 1988
DOCUMENT TYPE: directory   ISSN: 0738-4343   LANGUAGE: ENGLISH
RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 9096   LINE COUNT: 00846

ABSTRACT: A vendor-sponsored directory of 13 companies offering automated
services to the financial community is presented. The directory includes
information concerning each vendor's strategic alliances as well as
descriptions of available products. The categories of software and services
listed include trading software, **database** management systems, financial
on-line **databases** , decision support software, artificial intelligence,
fundamental analysis software, market data, client management, portfolio
management, technical analysis, and quotations. The address, telephone
number, and contact for each company are listed as well.

ABSTRACT: Digital Selective Calling (DSC) is the latest development in
marine electronics that expands the functions of the VHF **radio** . The DSC,
unlike other **radio** receivers, diplays data and has a unique identity
number to ensure privacy. Its 'push button' feature enables mariners to
connect direclty with other users of the DSC even without passing Channel
16. The **radio** can also be linked to onboard GPS or Loran stations because
of its Mayday function.
